PROJECTS

E-Commerce Website — Frontend

The website boasts a range of features such as product listings, a shopping cart, and a checkout process, all powered by JavaScript, HTML, and CSS for a dynamic and interactive experience. The layout and design of the website is built using CSS, ensuring that it is visually appealing and responsive to different screen sizes. [\[See Live\]](#) [\[Source Code\]](#)

Music Player (Android) — Responsive

It includes features such as the ability to play, pause, and skip songs and browse your music library. The app has a user-friendly interface with features like album art and song information display. This music player app is built using Java and Android Studio. [\[Source Code\]](#)
